Dubai curbs squeeze India's EXIM trade

'Strict security protocols, real-time tracking systems must in warehouses'

October 25, 2024

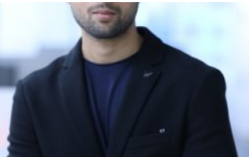

Sandeep Chadha, Founder & CEO, Warehouser says, "To ensure cargo safety in warehouses, companies must implement strict security protocols, invest in real-time tracking systems, and utilise advanced monitoring technologies like RFID and IoT sensors. Regular staff training on proper handling and storage techniques is crucial to preventing damage. Additionally, emergency preparedness plans and regular safety audits can help mitigate risks, ensuring both the protection of cargo and the smooth operation of the facility."
